Ruflo Harness — RA Repurposing Review Pipeline

Rule 0 — Prime Directive

- Cheapest path to guaranteed thesis + Q1/Q2 journal acceptance
- 100% self-funded out of pocket, no grant/university budget
- Zero-spend filter: no RT-qPCR/Western blot/multiplex, local Egyptian kits only

RULE 1 — Agent Policy

- Announce agent count + exact names/jobs before every spawn, no exceptions
- research-synthesist.md is always the inline base role for review work
- Mechanical ask-gate on every Agent/Workflow call confirms the announcement

Gates & Loops

- 3 tries or same findings twice = stop and escalate to the user, never self-scored
- Harness change (any script/hook/workflow) needs evals.py at 0 still failing
- keep_rate.py below 0.5 = fix the check itself, not the draft
